Commercial Services Commercial water needs such as RO membrane products and services, water softener salt delivery, and filtration products and services are all part of Lakota Water Company's mission. Historically, Lakota Water Company's main focus is rainwater collection systems. Rainwater collection is not limited to residences. We've installed systems for commercial customers as well. Call us to discuss your rainwater collection needs. Key Benefits

- &diam; Installation and maintenance of equipment by industry experts.
- &diam; All major brands available
- &diam; Service plans available.

### Capabilities

#### Water Conditioning Equipment Installation

Water softeners, chlorinators, Reverse Osmosis Systems (ROs), filters, pumps, tanks, and plumbing installation are all services provided by Lakota Water Company.

#### Water Conditioning Equipment Maintenance

Lakota Water Company services and maintains your water conditioning system - even if you did not buy the equipment from us. Typical systems include water softeners, filters, and ultraviolet lamps.

#### Water Equipment Parts and Service

Lakota Water Company keeps an inventory of common parts for servicing commercial equipment. We will service and install the needed parts to keep your water equipment in tip-top shape.

#### Water Treatment Maintenance Contracts

We'll maintain your water treatment equipment, replace filters, maintain salt levels in water softening equipment, and monitor performance. In short, we relieve our customers of the day-to-day water operations as well as being on call for their water needs and problems.

Locations Served Lakota Water Company currently offers water treatment and purification services for Austin, Dripping Springs, Bee Cave, and San Marcos, TX. Our service area is always expanding so contact us today.
